Art Unit: 2871

*Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10 and 22-31, drawn to a liquid crystal display (LCD) device having a thin film transistor (TFT), classified in class 349, subclass 43.
  - II. Claims 11<sup>21</sup>, drawn to a method of fabricating a TFT of an LCD device, classified in class 438, subclass 30.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product of Group I can be made by a different method from Group II, e.g. a method of forming a pixel electrode without the step of back exposure.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
